## RISK WARNING

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

A Money Market portfolio is not a bank deposit account and the price is targeted at a constant value. The total return is made up of interest received and any gain or loss made on any particular instrument; and in most cases the return will have the effect of increasing or decreasing the daily yield, but in the case of abnormal losses it can have the effect of reducing the capital value of the portfolio. The yield is calculated as a weighted average yield of each underlying instrument in the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed.

A Fund of Funds is a portfolio that invests in portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for these portfolios.

A Feeder Fund is a portfolio that invests in a single portfolio of a collective investment scheme which levies its own charges and which could result in a higher fee structure for the feeder fund.

The Manager retains full legal responsibility for any third-party-named portfolio.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information.

The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Prescient is a member of the Association for Savings and Investments SA.
